RESEARCH PROFILE

PhD Researcher in Machine Learning and Generative AI developing LLM-based methods for market research.
Research focus: generative embeddings · synthetic data · multi-agent systems · market research
Technical focus: transformer models, fine-tuning and GPU-based training (PyTorch, CUDA, SLURM)

EXPERIENCE

Erasmus School of Economics — <i>PhD Candidate, Quantitative Marketing</i>	2024–Present
· Generative embedding models for controllable text refinement · Multi-agent architectures for structured ideation · Bayesian integration of human and synthetic data · Large-scale experimentation with transformer-based models on GPU infrastructure	
Deutsche Bundesbank (RIAD Data Lab) — <i>Data Science Intern</i>	2021
· Scalable data pipelines for corporate credit datasets · NLP-based entity resolution and classification	
Lidl (Advanced Analytics) — <i>Data Science Intern</i>	2020
· ML forecasting using time-series and text features · Deployment within retail big-data infrastructure	

EDUCATION

Research Master Business Data Science (8.2) — <i>Tinbergen Institute</i>	2024
· Full Scholarship (2024, 2025) · Thesis: <i>Novel Generative Embeddings for Market Research</i> (8.5—best in class)	
M.Sc. Data Science in Business and Economics (1.24¹) — <i>University of Tübingen</i>	2022
· Machine Learning (Computer Science), Econometrics · Texas A&M University (semester abroad in M.Sc. Economics) · Thesis: <i>Semi-supervised LDA for Measuring Geopolitical Risk</i> (1.0)	
B.Sc. Economics & Business Administration (1.49) — <i>University of Tübingen</i>	2019
· Thesis: <i>Logistic Regression Analysis of the Hot Hand Phenomenon</i> (1.0)	

WORKING PAPERS

<i>Generative Embeddings for Marketing Text Refinement and Validation</i> (with Bas Donkers, Dennis Fok)
<i>Using LLMs to Measure Sensitive Topics</i> (with Martijn de Jong, Rik Pieters)
<i>Agentic Teams for Strategic Ideation</i> (with Michiel van Crombrugge, Julian Wichmann, Stefan Stremersch)

¹German grading scale: 1.0 top grade

CONFERENCE PRESENTATIONS

- Using LLMs to Measure Sensitive Topics — Marketing Science Conference 2025 (special session)
- Generative Embeddings for Marketing Text Refinement and Validation — Marketing Science Doc. Consortium 2026
- Generative Embeddings for Marketing Text Refinement and Validation — Marketing Science Conference 2026

GRANTS

- Google Cloud Academic Research Grant — 2000 EUR (2025)
- SURF Small Compute Grant — 2500 EUR (2025)
- ERIM Support Programme — 1000 EUR (2025)
- SURF Small Compute Grant — 2500 EUR (2026)

TEACHING

- Erasmus School of Economics**—*Teaching Assistant / Supervisor* 2024–Present
 - Text Analytics; UNICEF case study (evaluation as a teacher 4.84/5 ($N = 25$)); thesis supervision
- Tinbergen Institute**—*Instructor* 2023–Present
 - [AI Agents in Economics and Business Research \(2-day course\)](#)
 - Natural Language Processing; Machine Learning 2

SKILLS

Programming Languages	Python, R, Julia, Stan, Matlab
Frameworks	PyTorch, HuggingFace, LangChain, CUDA, Spark, SQL, SLURM, OpenClaw, Codex
Languages	German (native), English (fluent), Dutch (B2), Spanish (B2)
